

## PRESS RELEASE

November 12, 2009 Racine, Wisconsin

Tech Corps Wisconsin, Inc. (TCW) is pleased to announce the latest effort in its continued support of educating children, and spreading computer literacy, in the state and specifically within the Southeast Wisconsin area with the announcement of a project at John XXIII Educational Center in Racine, WI.

"We have been asked to help them with this project by supplying six refurbished Pentium 4 desktop computer systems, and a laser printer to create a computer lab for an afterschool program" said Michael Pitsch; Executive Director for Tech Corps Wisconsin, Inc. Wednesday November 11th is the installation date of the computers at the school located at 1101 Douglas Ave. in the former San Juan Diego school in Racine.

"These computers will facilitate our afterschool program here at John XXIII Educational Center." said Brother Mike Kadow.

"Tech Corps Wisconsin is a wonderful program. The computers they provide to us will be used to enhance academic studies here at the John XXIII Educational Center," said the school's AmeriCorps volunteer Andy.

This project is a continued experiment in re-defining how education is delivered to our community's citizens, wherever they are, to better prepare them to meet the challenges of their futures. The collaborative nature of the project includes a number of public and private businesses throughout SE Wisconsin who provided the material donations and the volunteers who are completing the work. "We are pleased to have been asked to participate in this venture to help make a difference in the futures of area children," said Pitsch.
