## Computer Lab In A Box

Tech Corps Wisconsin, Inc. is a statewide, non-profit volunteer organization dedicated to bridging the digital divide by providing access to technology for children.

## What We Do

TCW works in six areas:

- **Providing technology equipment, training and support to schools and community agencies.**  
Thousands of the refurbished computers have found new homes in schools and non-profits across the state.
- **Providing computers, training, support and Internet access to disadvantaged families.**  
TCW has provided hundreds of computers to Racine area low-income families.
- **Providing low-cost Internet service to Racine residents.**  
TCW makes low-cost Internet access available to families in Racine.
- **Training TCW volunteers in workforce development skills.**  
Over the last eight years many of the TCW volunteers have taken the technical and life skills they have gained while volunteering at TCW and used them productively in the community.
- **Training classes in basic and advanced computer literacy.**  
TCW provides low-cost computer training classes from beginning computers to advanced Microsoft Word.
- **Recycling unusable computers in an environmentally friendly process.**  
Every computer that gets donated to TCW gets properly recycled and kept out of our landfills.
